COMPANY PROFILE

BSC Resources Sdn. Bhd. (954029-V)

About BSC

BSC Resources Sdn Bhd was established in 2011 as a 100% Bumiputera-owned company in Sarawak. Since its inception, the company has grown into a trusted player in civil engineering, road construction, building works, drainage systems, and telecommunication infrastructure.

Backed by ISO 9001:2015 certification, BSC Resources has built a solid reputation for quality, professionalism, and timely delivery. Today, we continue to expand our expertise and contribute to sustainable development across Sarawak through reliable construction and infrastructure solutions.

Project Portfolio

Construction of Telecommunication Tower Across Sarawak

Telecommunication Tower Construction

Since 2015, BSC Resources Sdn. Bhd. has built a strong track record in delivering telecommunication tower projects across Sarawak, encompassing design, supply, construction, erection, and commissioning.

Project Portfolio

Construction of Telecommunication Tower Across Sarawak

Telecommunication Tower Construction

BSC Resources Sdn Bhd has successfully completed numerous telecommunication tower projects, including design, construction, erection, and commissioning.

Project Portfolio

BSC Resources Sdn Bhd has successfully completed various telecommunications tower projects, providing reliable and innovative infrastructure solutions for our clients. Our capabilities include a variety of tower designs to meet different site, coverage, and technical requirements. The types of telecommunications tower that BSC Resources Sdn Bhd has successfully completed are:

Monopole Tower

Compact, reliable, and easy to install, our monopole towers provide efficient telecommunication coverage for urban and space-limited sites.

45m Telecommunication Tower

The 45m towers deliver reliable medium-range network coverage. Built for durability and stability, they efficiently support antennas and communication equipment in both urban and suburban areas.

60m Telecommunication Tower

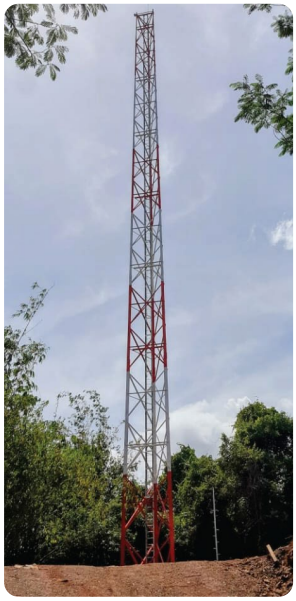

The 60m tower provides strong network coverage with reliable structural performance. Designed for rural and semi-urban areas, it supports multiple antennas and communication equipment efficiently.

76m Telecommunication Tower

The 76m towers are heavy-duty structures designed for wide-area coverage and high-capacity network support. 76m tower structure ideal for major communication backbones, broadcasting, and multi-operator installations.

Monopole Tower – Chin Lee, Bintulu

45m Telecommunication Tower – Klinik Long Lama

60m Telecommunication Tower

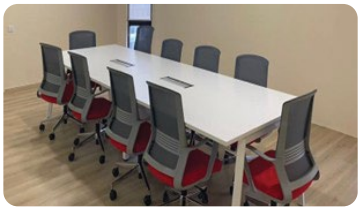

75m Telecommunication Tower

Project Portfolio

Company Objectives

BSC Resources Sdn Bhd aims to deliver high-quality construction, civil engineering, and telecommunication projects that meet international standards. With a focus on sustainability and innovation, we strive to support Sarawak's growth while upholding professionalism, integrity, and strong work ethics.

Our objectives include ensuring timely and cost-effective project delivery, creating positive community impact through job opportunities and social initiatives, and building lasting client partnerships based on trust and excellence.

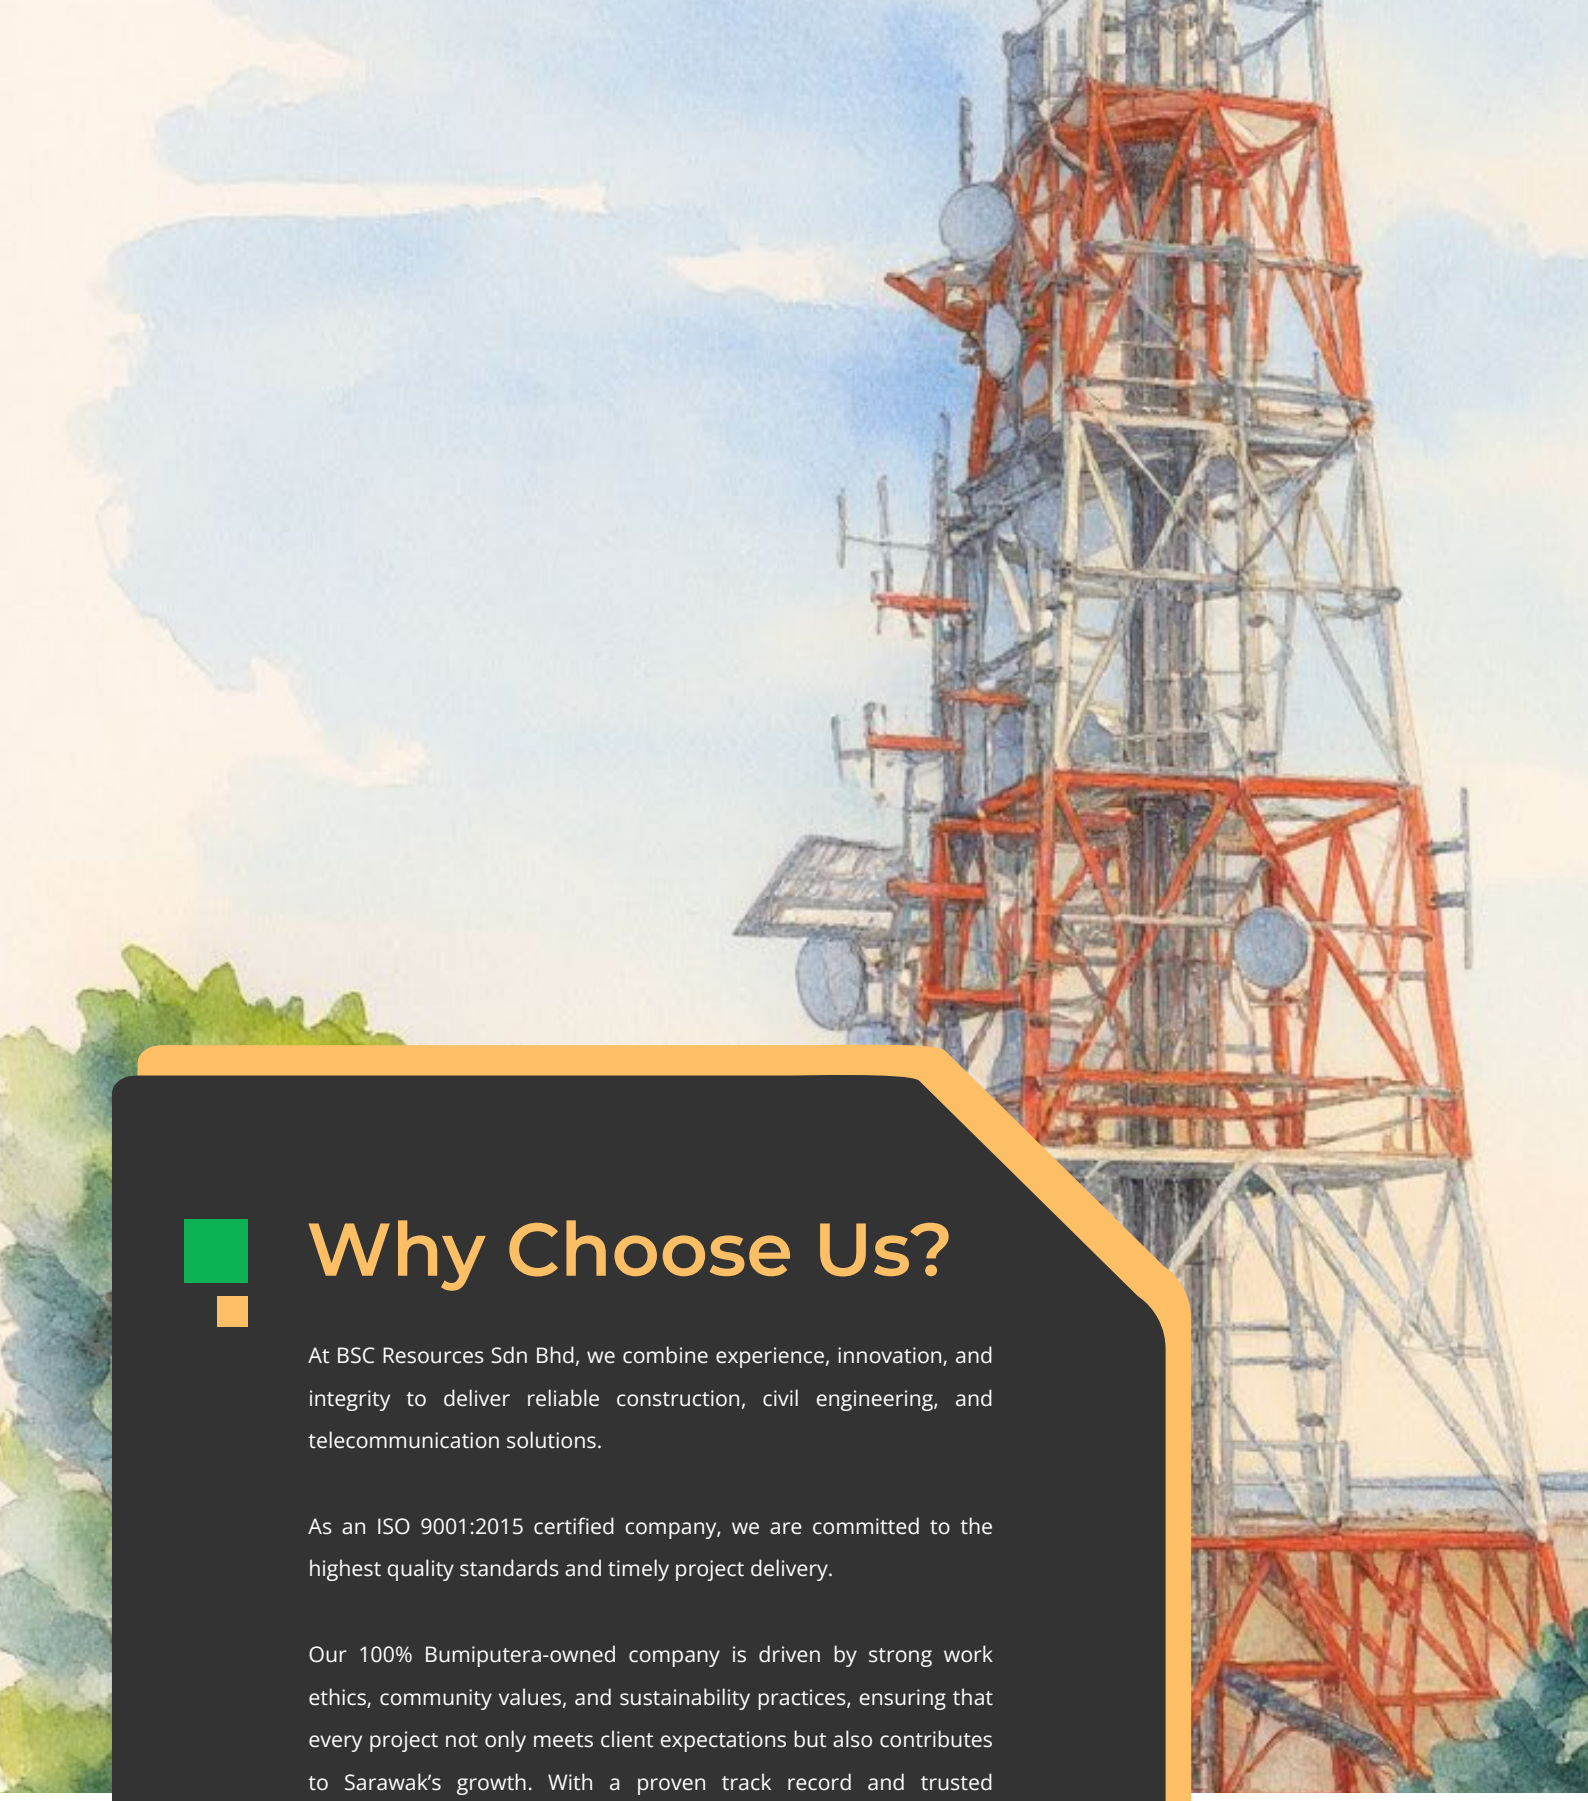

VISION

To foresee and nurture the growth and developments of a sustainable society by implementing suitable and sustainable constructions.

MISSION

To install positive motivations and to promote honesty in the work ethics within the vision of the company

Why Choose Us?

At BSC Resources Sdn Bhd, we combine experience, innovation, and integrity to deliver reliable construction, civil engineering, and telecommunication solutions.

As an ISO 9001:2015 certified company, we are committed to the highest quality standards and timely project delivery.

Our 100% Bumiputera-owned company is driven by strong work ethics, community values, and sustainability practices, ensuring that every project not only meets client expectations but also contributes to Sarawak's growth. With a proven track record and trusted partnerships, we are your dependable choice for infrastructure and development solutions.

What We Do?

Civil Engineering Works

Our civil engineering services cover the entire project lifecycle, from initial planning and structural design to on-site execution and delivery. We specialize in infrastructure development that meets diverse community and industrial needs. With a focus on technical excellence and project management efficiency, we deliver solutions that are practical, reliable, and aligned with both client expectations and regulatory standards.

Road Construction & Maintenance

We have extensive expertise in constructing and maintaining roads that serve as vital links for communities, industries, and businesses. Our focus is on building safe, durable, and sustainable road networks that improve accessibility, support economic activities, and ensure long-term usability, even in challenging terrains across Sarawak.

Drainage & Irrigation Works

Effective water management is at the core of our drainage and irrigation services. We design and install modern systems, including culverts and flood control structures, that help manage water flow, reduce flood risks, and protect both urban and agricultural areas. Our solutions are engineered to enhance land productivity while ensuring environmental sustainability.

Telecommunication Infrastructure

As part of Sarawak's growing digital economy, BSC Resources plays an active role in enhancing connectivity. We supply, construct, and maintain telecommunication towers and related infrastructure, supporting initiatives that bring high-quality communication services to urban, rural, and remote areas. Our experience ensures that projects are delivered on time, with strong compliance to industry standards, helping bridge the digital divide in Sarawak.

Building Construction & Renovation

From affordable housing schemes to large commercial and industrial projects, we provide a full spectrum of building construction services. Our capabilities extend to renovation and upgrading works, where we tailor solutions to meet specific client requirements. Every project emphasizes quality, safety, and cost efficiency, ensuring functional and aesthetically pleasing results that stand the test of time.
